

Unlock Classroom Potential, Drive Student Success with Data

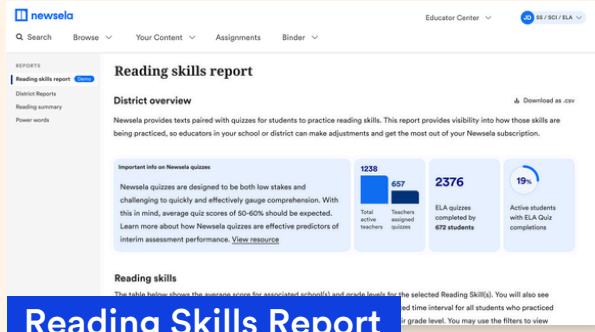

Clear and measurable data equips educators to understand student needs and adjust instruction to drive learning outcomes. In the classroom, teachers use the insights to tailor their teaching and further develop reading skills. School and district leaders can leverage detailed reports to ensure usage aligns with efficacy recommendations.

Teacher and Student Reports

Equip teachers with insights into both classroom and student performance.

Easy-to-understand visuals help teachers identify classroom patterns and better understand student needs — essential data to inform how they can best build skills and reading growth.

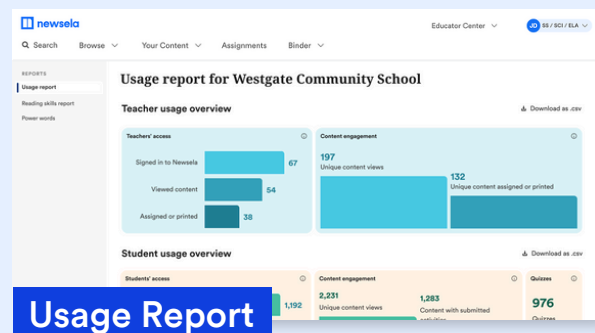

Reading Skills Report

See the progress students are making with reading skills and plan accordingly.

Newsela's Reading Skills Report offers administrators access to a district or school summary of ELA skills, along with detailed performance data on specific reading skills at the school level. It also provides insights into performance categorized by whether quizzes were taken at, above, or below grade level.

Available for Newsela ELA customers.

Usage Report

Understand how Newsela products are being used in your district.

The Usage Report shows how actual Newsela usage in your school aligns with recommendations from our efficacy studies. See how specific schools, grades, or teachers use Newsela during a defined period. Better understand where to celebrate success and where to offer additional support.
